Flexible solutions according to your business needs

TIME & ATTENDANCE SYSTEM

is an all inclusive business solution that can interface to all existing payroll systems and allows organizations and individuals to electronically collect and track real time workforce data, streamlining the payroll process.

When dealing with countless employees and time and attendance, efficiency is what companies demand. The system provides you with a viable solution to reduce the processing time and decrease errors associated with a manual time-keeping process.

ACCESS CONTROL SYSTEM

RF ID Access Control System is a product of Digitec Systems. It is developed with the aim of providing security, access control and attendance management to organizations with the ease of usage. With the help of this not only the access can be secured and restricted but a complete log of activities can be maintained of each site. The main functions of this system are

- Authorized Access of each site
- Centralized log generation
- Reports Generation
